CLNG Congratulates Tellurian's Driftwood LNG and Sempra's Port Arthur LNG on FERC Authorization

(Washington, D.C.) – The Center for LNG issued the following statement regarding the announcement that FERC has voted to authorize Tellurian's Driftwood LNG and Sempra's Port Arthur LNG export facilities.

Charlie Riedl, Executive Director of the Center for LNG said,

"We applaud FERC for its hard work and dedication in ensuring a predictable LNG process. We are pleased to see a collaborative path forward for LNG export projects thanks to the Commission's rigorous review process.

"This is great news for Driftwood LNG, Port Arthur LNG and U.S. LNG as a whole. As the United States races to bring more supply to the global market, these decisions help ensure that U.S. LNG projects are not unnecessarily delayed and can compete."

####

The Center for Liquefied Natural Gas (CLNG) is a trade association of LNG producers, shippers, terminal operators and developers, and energy trade associations. CLNG facilitates rational issue discussion and the development of public policies that support LNG's contribution toward economic growth in the United States.
