Center for LNG Statement on S.8 “Timely Review of Infrastructure Act” Supporting FERC and DOE in LNG Permitting

(Washington, D.C.) – In response to the introduction of S.8, the “Timely Review of Infrastructure Act” by Senators Cassidy and Murkowski, the Center for Liquefied Natural Gas (CLNG) Executive Director Charlie Riedl issued the following statement:

“We welcome this effort to streamline the permitting process of LNG facilities. The hardworking staff at DOE and FERC are critical to the LNG process and making sure they have the tools and resources necessary is essential to meeting the U.S. LNG industry’s window of opportunity.

“Certainty is key to the LNG industry, and this legislation seeks to facilitate the certainty and predictability that projects need to move forward.

“We look forward to working with Senators Cassidy and Murkowski and other stakeholders to ensure that the LNG review process is efficient, timely, and predictable.”

####

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full value chain, including LNG producers, shippers, terminal operators and developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
