Center for LNG Statement in Support of the Lower Energy Costs Act's (H.R. 1) Passage in the House of Representatives

(Washington, D.C.) – The Center for LNG (CLNG) issued the following statement following the passage of H.R. 1 in the House of Representatives.

Charlie Riedl, CLNG Executive Director, said:

“We support meaningful infrastructure permitting reform and urge Congress to work together to support solutions like H.R. 1.

“As the world continues to look to U.S. LNG as a way to enhance energy security and reduce emissions, modernizing the energy-infrastructure approval process so that natural gas can reach consumers in an affordable, timely, reliable and environmentally-responsible way is essential to meeting global climate ambitions. We applaud this effort to improve permitting so that we can achieve global climate goals.”

Visit CLNG’s [website](#) for more information and data on LNG’s [environmental benefits](#) and the economic benefits of [exports](#).

-CLNG-

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant, clean and versatile fuel can be fully realized.
