### **Center for LNG Statement in Support of NextDecade's Rio Grande LNG and Rio Bravo Pipelines Company**

(Washington, D.C.) – The Center for LNG (CLNG) issued the following statement on the vote by the Federal Energy Regulatory Commission (FERC) to grant certification on NextDecade's Rio Grande LNG export facility and the Rio Bravo Pipeline.

**Charlie Riedl, CLNG Executive Director**, said:

“Rio Grande LNG represents billions of dollars in investment, thousands of jobs, and global emissions reductions. As the world continues to look to U.S. LNG as a way to enhance energy security and reduce emissions, this news is welcome.

“We are appreciative of the hard work by both NextDecade LNG and the FERC to come to this decision.”

Visit CLNG's [website](#) for more information and data on LNG's [environmental benefits](#) and the economic benefits of [exports](#).

-CLNG-

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant, clean and versatile fuel can be fully realized.
