Center for LNG Statement on the *Energy Permitting Reform Act of 2024*

(Washington, D.C.) – The Center for LNG (CLNG) issued the following statement in reaction to Senators Manchin and Barrasso introducing the *Energy Permitting Reform Act of 2024*.

Charlie Riedl, CLNG Executive Director, said:

“The *Energy Permitting Reform Act of 2024* includes important provisions to provide regulatory certainty for large-scale U.S. LNG export facilities, ensures fact-based decision-making on future studies by the Department of Energy (DOE) around the economic and climate benefits of continued U.S. LNG exports, and incentivizes investments in U.S. infrastructure that are vital to our national interests and global climate goals.

“This legislation would permanently end the Department of Energy’s devastating pause on U.S. LNG export authorizations and unlock more of the benefits of U.S. LNG exports at home and around the globe.

Visit CLNG’s [website](#) for more information on how the U.S. LNG export authorization pause is impacting our economy, our allies, and the climate.

-CLNG-

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant, clean and versatile fuel can be fully realized.
